

Scientist

LUX Assure specialises in developing on-site chemical monitoring technologies for the oil and gas industry. We aim to be the world leader in providing new, on-site technology to monitor difficult-to-detect chemicals used by the oil and gas industry.

LUX is currently recruiting for the position of Scientist at our Edinburgh facility. The role will involve a significant amount of laboratory work, primarily method development. We anticipate providing the successful candidate with training to conduct on-site work, in areas as diverse as the Middle East, North Sea and Australia. Such on-site work is unlikely to be the primary focus of the role, but may be required from time to time.

Essential Skills and Experience

- 2:1 (minimum) honours degree in chemistry, other qualifications will be considered if paired with relevant experience
- minimum of 2 years' laboratory based industrial experience
- confidence and demonstrated ability to pick up diverse techniques, quickly and to a high standard
- experience of working in an R&D environment, including ability to conduct literature research, design detailed experiments and analyse complex data sets
- thorough working practices with good attention to detail
- excellent communication skills, both oral and written
- good analytical and problem solving skills
- this role may involve working on several projects in parallel, therefore good time management and organisational skills are essential

You must be eligible to work in the UK

Desirable Skills and Experience

- experience in the oil and gas sector; ideally in production chemistry
- experience in taking technical products through development to commercialisation

Duties and Responsibilities

- this role will be mainly laboratory based, at our Edinburgh facility
- some on-site work, both offshore and onshore, may be required; relevant training will be provided
- designing and conducting experiments
- processing and analysing data
- researching complex ideas and theories
- providing technical support to service personnel
- writing reports and presenting results
- periodic travel will be required, within the UK and abroad

The successful applicant must be able to demonstrate the skills and experience required. This should be explicitly stated in a covering letter.
